

Velvet added a bathroom and bedroom to our house and it looks like it was built when the house was built. She did it all: the windows, lights, floor tiles and doors. We showed her the space and she brought us material boards and photo boards. Her drawing skills are well honed, with great attention to detail. She is really good at AutoCAD, too. She is “on it” at the business level and I admire her design aesthetic. She is great at giving professional attention to the business end of her business. She is as much in tune with the business side of her design company as the artistic side, always very punctual and time efficient.
